- **Description:**

A personal website designed using React, showcasing my skills in web development. The website consists of multiple pages, including a home page, about page, and contact page.

- **Technologies Used:**

- React: A JavaScript framework for building component-based applications.
- Components: Utilized React components to create the website's structure.
- Props: Used Props to pass data between components.
- List Rendering: Employed list rendering to display data lists.
- Use State: Utilized the Use State hook to manage application state.
- EmailJS: Integrated EmailJS to send emails from the contact page.
